# Project Overview

This dashboard helps visualize and monitor **project risks and opportunities.**

It allows users to track risks by **owner, severity, likelihood, and status.**

Provides actionable insights using **weighted risk scores.**

**Goal:** To help PMOs, Risk Managers, and Project Leads make data-informed decisions on risk mitigation.

---

# Objectives / Goals

- ✓ Provide executives and project managers a **quick overview** of active risks
  - ✓ Enable **risk owners** to monitor assigned risks and mitigation progress
  - ✓ Support **prioritization** using *weighted risk scores (Severity × Likelihood)*
  - ✓ Promote **data transparency** across teams
-

# Risk Summery

## Risk/Opportu...

- ☐ Alice
- ☐ Bob
- ☐ Charlie
- ☐ Diana

## Status

- ☐ Closed
- ☐ In Progress
- ☐ Open

## Likelihood

- ☐ 1
- ☐ 2
- ☐ 3
- ☐ 4

## Risk Status

Sum of Is Open

500

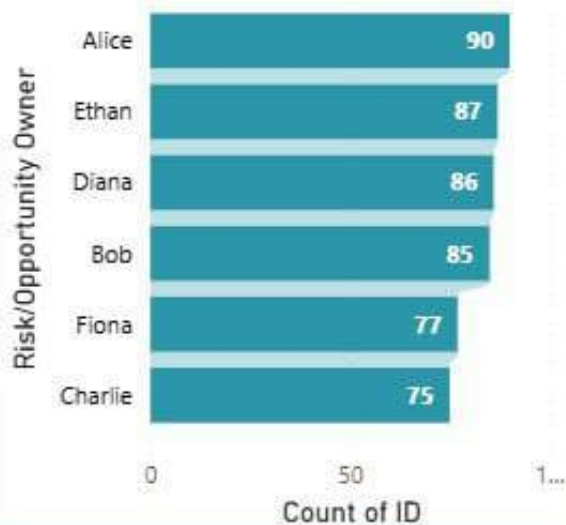

Sum of Lilelihood

1508

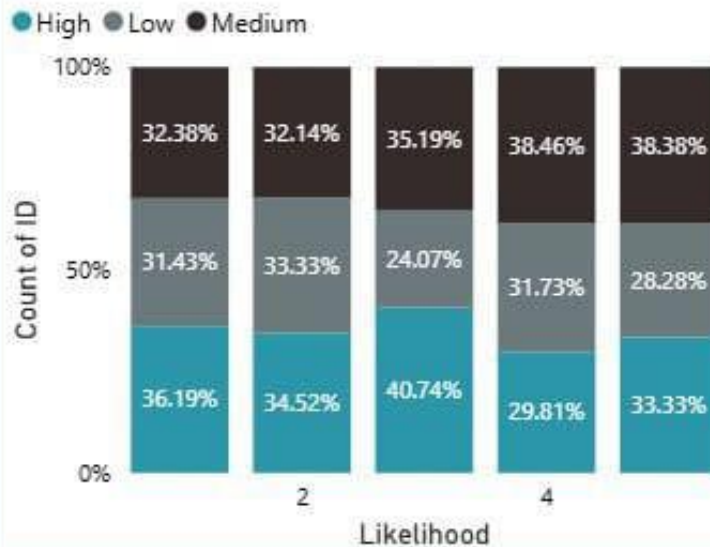

Sum of Severity

1488

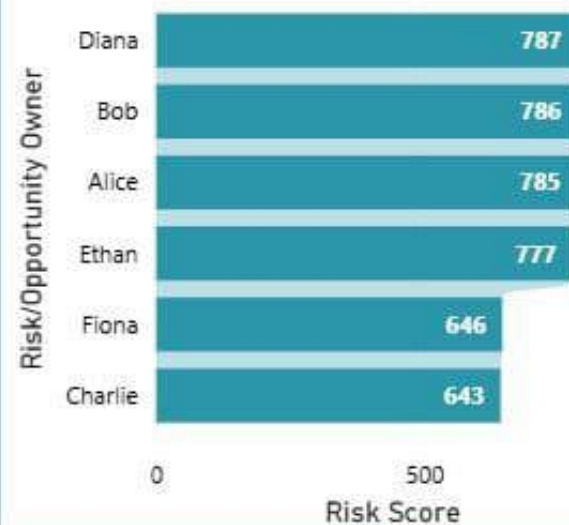

## Count View (by Number of Risks)

## Risk Level by Likelihood

## Weighted View (by Risk Score)

## Owner vs Risk Category

Risk/Opportunity Owner	Critical	Low	Moderate
Alice	12	56	22
Bob	8	49	28
Charlie	11	50	14
Diana	13	53	20
Total	44	208	84

## Full Risk Details

Count of ID	Risk/Opportunity Description	Risk/Opportunity Owner	Sum of Likelihood	Sum of Severity / Impact	Mitigation Plan
1	Supplier failure risk	Alice	1	3	Mitigation plan 12
1	Supplier failure risk	Alice	3	3	Mitigation plan 14
1	Supplier failure risk	Alice	2	1	Mitigation plan 21
1	Supplier failure risk	Alice	3	3	Mitigation plan 22
4			1508	1488	

---

# Target Audience

 PMO (Project Management Office)

 Risk Managers

 Project Leads

 Executives & Decision Makers

---

# Data Model & Sources

**Data Table: risks**

**Columns:**

RiskID, RiskDescription

RiskCategory

**Data Sources:**

Excel / CSV files

SQL Server / PostgreSQL

API from Risk Management Tools

# Key Metrics & KPIs

Metric	Description
<b>Total Open Risks</b>	Count of active risks (IsOpen = True)
<b>Sum of Severity</b>	Total severity of all open risks
<b>Sum of Likelihood</b>	Total likelihood values
<b>Weighted Risk Score</b>	Sum of (Severity × Likelihood)
<b>Status Breakdown</b>	Open / In Progress / Closed
<b>Owner-Level Ranking</b>	Risk count and score by owner

---

# Dashboard Features & Interactions

**Filter Pane –**  
Filter by Owner,  
Status, or  
Likelihood

**Top KPIs –** Big  
numeric cards for  
quick insight

**Owner Ranking**  
– Horizontal bar  
charts by count &  
score

**Stacked Bars –**  
Risk level by  
Likelihood

**Detailed Table**  
– Searchable and  
exportable

**Export Option**  
– CSV/Print from  
Power BI

# DAX Measures Used

Is Open Count = CALCULATE(COUNT('risks'[RiskID]), 'risks'[IsOpen] = 1)

Sum Severity = SUM('risks'[Severity])

Sum Likelihood = SUM('risks'[Likelihood])

Risk Score = SUMX('risks', 'risks'[Severity] \* 'risks'[Likelihood])

# Tools & Technologies

 **POWER BI DESKTOP**

 **EXCEL / CSV (SAMPLE DATASET)**

 **DAX (DATA ANALYSIS EXPRESSIONS)**

 **ETL & DATA CLEANING (POWER QUERY)**

 **DATA MODELING (RELATIONSHIPS, CALCULATED COLUMNS)**

---

# Outcomes / Insights

**Clear visualization of project risk  
landscape**

Faster decision-making for high-risk items

Identification of top risk owners

Improved resource allocation & mitigation  
planning

---

# Challenges & Learnings

## Challenges:

Designing weighted risk score logic

Managing multiple filters without breaking visuals

Maintaining clean data model relationships

## Learnings:

Strong understanding of **Power BI interactivity**

Better grasp of **DAX calculations and performance**

Enhanced skill in **business problem-solving using data**

# Project Impact

Improved project risk tracking efficiency

Saved time for executives and managers

Enhanced data-driven decision-making

# CERTIFICATE

OF COMPLETION

This certifies that

**Ankita Choubey**

has successfully completed

**Risk Register Dashboards in Power BI**

Difficulty Level: BEGINNER

Technologies: powerbi • excel

Completed: October 5, 2025

**Certificate ID: VEBDUJ8TDK2V**
